

# Key Clinical Trial Requirements on ct.gov

## Main Governing Bodies

- **FDA**
  - Applicable Clinical Trials
  - FDAAA 801 and Final Rule (effective 2007 and 2017)
- **NIH**
  - Dissemination of Information (effective 2017)
- **ICMJE**
  - International Committee of Medical Journal Editors
- **Others**
  - CMS: Center for Medicare and Medicaid Services,
  - Dept of Veterans Affairs

<u>Summary of Requirements</u>	<u>Applicable Clinical Trials (ACTs): FDAAA 801 and 42CFR Part 11</u>	<u>NIH-Funded Clinical Trials: NIH Dissemination Policy</u>	<u>ICMJE Policy</u>
<b>Scope</b>	Interventional Study of a FDA-Regulated drug, biological, and device products (not Ph1, SIND, feasibility)	Interventional studies, any Phase including behavioral studies, fully or partial funded by NIH	Any interventional Clinical Trials with health outcome
<b>What &amp; When</b>			
<b>Registration:</b>	Register within 21 days of enrollment	Register within 21 days of enrollment	Register prior to enrollment
<b>Annual Verification</b>	every 12 months	every 12 months	every 12 months
<b>Modifications:</b>	within 15 - 30 days of change	within 15 - 30 days of change	within 15 - 30 days of change
<b>Results:</b>	One year of Primary completion date	One year of Primary completion date	Encouraged, but not required
<b>Protocol (and statistical analysis plan if not in protocol):</b>	One year of Primary completion date	One year of Primary completion date	Encouraged, but not required
<b>ICF (Informed Consent Form):</b>	Not required	After study is closed to recruitment, and no later than 60 days after the last study visit by any subject	Not required
<b>Enforcement</b>	Criminal proceedings and civil penalties (over \$13,000/day); loss of HHS funding	Withholding/loss of NIH funding	Ineligibility to publish

# Navigating New Mandates ClinicalTrials.gov An Investigators Perspective

**Rita R. Alloway, PharmD, FCCP**  
**Research Professor of Medicine**  
**Director, Transplant Clinical Research**  
**Director, Transplant Pharmacy Specialty**  
**Residency and Fellowship**

**University of Cincinnati**  
**[rita.alloway@uc.edu](mailto:rita.alloway@uc.edu)**

# Understanding the Different Demands of the Investigator

## Goals of a Grant

- Obtain funding to test hypothesis
- Provide human subject protocol in a concise manner
- Novel science is typically the driving force
- Intellectual ideas are potentially still fluid

## Goals of [clinicaltrials.gov](https://clinicaltrials.gov)

- Collect and share significant summary protocol information before and during the trial
- Summarize results and adverse events
- Provide transparency to patients, investigators, sponsors to build public trust.

# How to Homogenize these Goals

- Collaborate with a clinical trialist EARLY
- If trial is multicenter, collaborate with a clinical trial organization or equivalent
- Interpret protocol as written in the grant into a clinical trial protocol for regulatory purposes, study implementation, and [clinicaltrials.gov](https://clinicaltrials.gov) reporting.
- Simplify primary and secondary endpoints and use tertiary endpoints for exploratory outcomes

# Current Disconnect

- In an effort to obtain grant funding, novel science is prioritized.
- To stay within budget limits, the human subject portion of the grant is woefully underfunded and tends to be an after thought.
- The full cost of human subject research is underestimated and not fully understood.
- Budgeted funds directed toward human subject study are disproportionately utilized by data management to meet mandates such as [clinicaltrials.gov](http://clinicaltrials.gov), etc

# Entering Study

- ClinicalTrials.gov is designed to cover ALL clinical studies, therefore, as a user, you will think “my study doesn’t fit”. You have to make it fit 😊

<http://www.ClinicalTrials.gov/beta/manage-recs/fdaa#WhenDoINeedToRegister->

- User pearls
  - Proper entering of a trial impacts downstream events
  - Enter your study in the most basic and simple form as possible
  - REALISTICALLY enter study start and study completion dates.
  - “Estimated” primary outcome completion endpoint (***date the last participant was examined or received intervention and data collected***) Of note....has NO relation to timing of data analysis.
  - Determination of intervention arms AND Arms/Groups are important because all results must be reported based upon this delineation
  - Responsible party identified as the sponsor or PI
  - Reporting requirements will change. When they change, they are retroactive to ALL active studies. Close studies in a timely manner.

# Reporting Results

- Results and Adverse events must be reported within 12 months of the “actual” data of primary outcome completion endpoint, but you will receive queries based upon estimated date.
- Results must be reported within 30 days of FDA approval.
- Other reporting elements must be current, ie overall study status, actual completion date (in the past), enrollment
- User pearls
  - Overall study status must be consistent with study start/completion dates and can not be “recruiting” or “not yet recruiting”
  - Enrollment must be actual and the SAME as the number “started” in participant flow
  - Results section must be consistent with Intervention Names in protocol
  - Results section must be consistent with Arms/Groups in protocol

[http://prsinfo.clinicaltrials.gov/results\\_definitions.html](http://prsinfo.clinicaltrials.gov/results_definitions.html)

# Closing a Study

- Reporting requirements will change.
- When they change, they are retroactive to ALL active studies.
- Close studies in a timely manner.
- ???

# Disseminating Results

- Historically, the investigator was focused on
  - Final report to sponsor
  - Manuscript publication in a high impact journal
- Now, additionally focus on results in [clinicaltrials.gov](https://clinicaltrials.gov)

***It is the gift that keeps on giving  
(or taking) 😞***

# Registration, Maintenance, & Results Reporting in Clinicaltrials.gov

# Registering a Study

*ClinicalTrials.gov PRS*

*Protocol Registration and Results System*

<https://register.clinicaltrials.gov/>

Login

Welcome to the [ClinicalTrials.gov](https://register.clinicaltrials.gov/) Protocol Registration and Results System (PRS).

Organization:   
One-word organization name assigned by PRS (sent via email when account was created)

Username:

Password:  [Forgot password](#)

Login

- Registration is required by law and for journal publication

The ICMJE emphasizes that such exceptions should be rare, and that authors failing to prospectively register a trial risk its inadmissibility to our journals.

# Registering a Study

- Enter the required data elements:

<https://prsinfo.clinicaltrials.gov/definitions.html>

- Required data elements fall under 12 broad categories:

**Protocol Section**

Identifiers: NCT  Unique Protocol ID:

Brief Title:

Module Status:

- Study Identification: ✓
- Study Status: ✓
- Sponsor/Collaborators: ✓
- Oversight: ✓
- Study Description: ✓
- Conditions: ✓
- Study Design: ✓
- Arms and Interventions: ✓
- Eligibility: ✓
- Contacts/Locations: ✓
- IPD Sharing Statement: ✓
- References:

# Study Information

## Study Identification

Unique Protocol ID: **Sponsor identifier**

Brief Title: **Short title in lay terms**

Official Title: **Protocol Name**

Secondary IDs:

## Study Status

Record Verification: February 2023

Overall Status: Not yet recruiting

Study Start: April 2023 [Anticipated]

Primary Completion: May 2024 [Anticipated]

Study Completion: September 2024 [Anticipated]

## Sponsor/Collaborators

Sponsor: Children's Hospital Medical Center, Cincinnati

Responsible Party: Sponsor

Collaborators:

## Oversight

U.S. FDA-regulated Drug: Yes

U.S. FDA-regulated Device: No

U.S. FDA IND/IDE: Yes

IND/IDE Information:

FDA Center: CBER

IND/IDE Number:

IND Serial Number:

Has Expanded Access: No

## Tips

- Use data element definitions guide to complete the entry fields
- Define acronyms
- Use realistic estimate for anticipated study start date
- Brief summary should be in lay terms and can be a helpful tool for recruiting.

## Study Description

Brief Summary:

**Describe the study and hypothesis**

Detailed Description:

**Technical description of study**

## Conditions

Conditions: **Disease**

Keywords:

# Study Design

## Study Design

Study Type: Interventional [[Change...](#)]

Primary Purpose: Treatment

Study Phase: Phase 2

Interventional Study Model: Parallel Assignment

Number of Arms: 2

Masking: Triple (Participant, Care Provider, Investigator)

Allocation: Randomized

Enrollment: 40 [Anticipated]

## Tips

- **Study type: Interventional, Observational, Expanded Access**
- **If your study does not conform to any study model choices, contact PRS support for advice.**
- **Models for observational studies are in the data element definitions**

## Definitions

### Interventional Study Model \*§

Definition: The strategy for assigning interventions to participants.

- Single Group: Clinical trials with a single arm
- Parallel: Participants are assigned to one of two or more groups in parallel for the duration of the study
- Crossover: Participants receive one of two (or more) alternative interventions during the initial phase of the study and receive the other intervention during the second phase of the study
- Factorial: Two or more interventions, each alone and in combination, are evaluated in parallel against a control group
- Sequential: Groups of participants are assigned to receive interventions based on prior milestones being reached in the study, such as in some dose escalation and adaptive design studies

# Arms & Interventions

* Arm Title:	<input type="text" value="Drug (generic name)"/>
	<small>Formerly Arm Label. Brief, descriptive label to be used as row or column heading in tables.</small>
* Arm Type:	<input type="text" value="Experimental"/>
[*] Arm Description:	<input type="text" value="Example: Subcutaneous dose of x mg of Drug every x weeks for x weeks"/>
	<small>Describe the intervention(s) to be administered. For drugs use generic name and include dosage form, dosage, frequency and duration.</small>

* Arm Title:	<input type="text" value="Placebo"/>
* Arm Type:	<input type="text" value="Placebo Comparator"/>
[*] Arm Description:	<input type="text" value="Example: Subcutaneous dose of placebo every x weeks for x weeks"/>

## Tip

- Describe arm: dosage form, dosage, frequency, and duration

## Definitions

### Arm Type \*

Definition: The role of each arm in the clinical trial.

- Experimental
- Active Comparator
- Placebo Comparator
- Sham Comparator
- No Intervention
- Other

## Tip

- For intervention description, do not repeat the arm description (Arm Type, however, should match Intervention name)

* Intervention Type:	<input type="text" value="Biological/Vaccine"/>
* Intervention Name:	<input type="text" value="Drug (generic name)"/>
	<small>For a drug, use generic name if established. Use the same name as in the associated Arm/Group Description(s).</small>
[*] Other Intervention Names: (if any)	<input type="text" value="Drug (brand name)"/>
	<input type="button" value="+ Add Other Name"/>
	<small>Include brand names, serial numbers and code names to improve search</small>
* § Intervention Description:	<input type="text" value="Describe intervention"/>
	<small>Do not repeat information already included in arm/group descriptions.</small>

# Arms and Interventions

- If study design is “parallel” interventional treatment with 2 arms:

Arms and Interventions	
Arms	Assigned Interventions
Experimental: <b>Drug (generic name)</b> <b>Arm description</b>	Biological/Vaccine: <b>Drug (generic name)</b> <b>Description of intervention</b> Other Names: <ul style="list-style-type: none"> <li>• <b>Drug (brand name)</b></li> </ul>
Placebo Comparator: Placebo <b>Arm description</b>	Biological/Vaccine: Placebo <b>Description of intervention</b>

- If study design is “single group assignment” interventional treatment with 1 arm:

Arms and Interventions	
Arms	Assigned Interventions
Experimental: <b>Drug (generic name)</b> <b>Arm description</b>	Drug: <b>Drug (generic name)</b> <b>Description of intervention</b> Other Names: <ul style="list-style-type: none"> <li>• <b>Drug (brand name)</b></li> </ul>

# Outcome Measures, Eligibility, and Data Sharing

## Outcome Measures

Primary Outcome Measure:

1. Primary outcome

Description

Secondary Outcome Measures:

3. Secondary outcomes

Description

## Eligibility

Minimum Age: 18 Years

Maximum Age: 70 Years

Sex: All

Gender Based: No

Accepts Healthy Volunteers: No

Criteria:

Inclusion Criteria:

## Plan to Share IPD

Definition: Indicate whether there is a plan to make individual participant data (IPD, typically after the end of the study). Select one.

- Yes: There is a plan to make IPD and related data dictionaries available.
- No: There is not a plan to make IPD available.
- Undecided: It is not yet known if there will be a plan to make IPD available.

## Tips

- **Clearly stated study protocol outcomes will make this entry significantly easier**
- **Primary, secondary, and pre-specified outcomes (exploratory) should be entered (Note: exploratory RESULTS are not required).**

- **All inclusion and exclusion criteria must be entered**

- **Sharing statement must align with the consent**

# Maintenance of Record

## Tips & Requirements

- Updates to a record can be made at ANY time
- Changes reflective of protocol amendments must be made at least every 12 months
  - Recommend sooner if significant to inclusion/exclusion
- Record Verification date should be updated every 6 months even if no changes are made

## Required Registration Updates

Responsible Parties should update their records within 30 days of a change to any of the following:

- [Recruitment Status](#) and [Overall Recruitment Status](#) data elements on ClinicalTrials.gov
- Completion Date (See [Primary Completion Date data element](#) on ClinicalTrials.gov)

# Tips for Record Maintenance

- Annual Verification
  - Consider checking in with annual IRB Continuing Reviews or other annual updates (i.e. Grant reporting or FDA reporting)
- Major Modifications
  - FDA approval or clearance of drug/biologic/device under study
  - Responsible Party changes
  - Individual Site Status changes
- Status Updates:
  - Enrollment, completed, withdrawn, terminated, etc.
  - Study dates: Start Date, Primary Completion, Study Completion

# Submitting Results

- Similar to preparing a manuscript for publication.
- **Best Practice:** An individual familiar with the study design and data analysis should be involved in order to accurately summarize the results.
- Enter the required data elements:  
<https://clinicaltrials.gov/ct2/manage-recs/how-report>  
[https://prsinfo.clinicaltrials.gov/results\\_definitions.html](https://prsinfo.clinicaltrials.gov/results_definitions.html)
- Required results fall under 4 broad categories:

## Results Section

---

Module Status:

Participant Flow: ✓

Baseline Characteristics: ✓

Outcome Measures: ✓

Adverse Events: ✓

# Participant Flow Identical in purpose to CONSORT Diagram but in table form

## Recruitment Information

Significant events following enrollment, but prior to assignment  
 400 participants were screened. 175 did not meet criteria.

Arm/Group

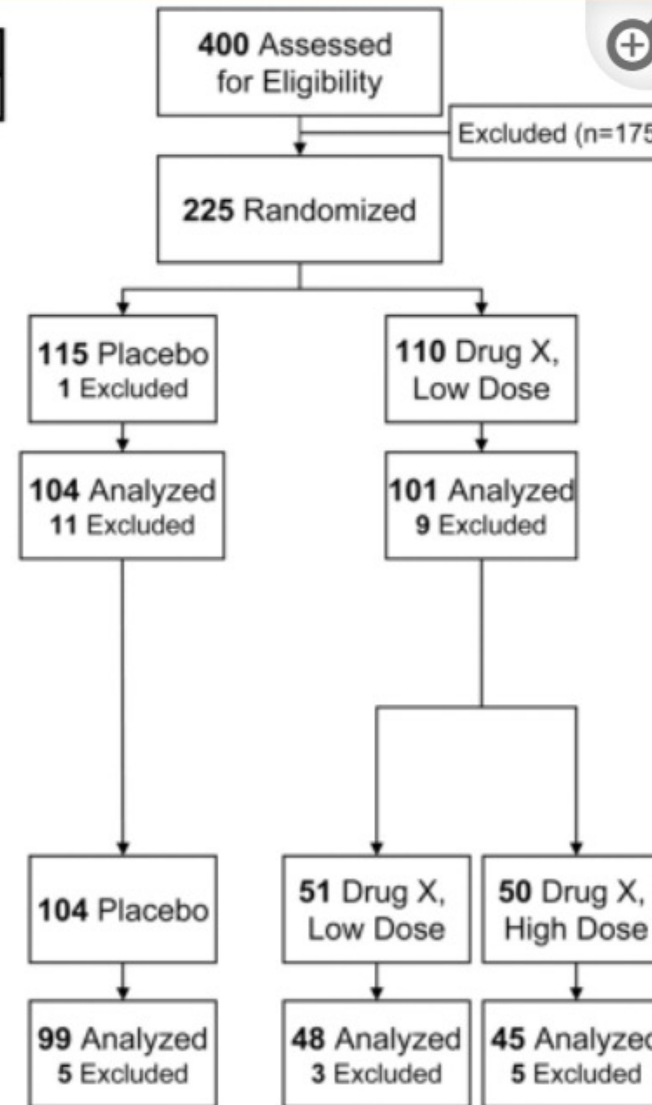

## Participant Flow: Treatment Initial Randomization (Period 1)

Milestone	Placebo	Drug X, Low Dose	Drug X, High Dose
STARTED	115	110	0
Received Intervention	114	110	0
COMPLETED	104	101	0
NOT COMPLETED	11	9	0
Adverse Event	4	5	0
Lost to Follow-up	4	2	0
Neutropenia	3	2	0

## Participant Flow: Treatment Re-Randomization (Period 2)

	Placebo	Drug X, Low Dose	Drug X, High Dose
STARTED	104	51	50
COMPLETED	99	48	45
NOT COMPLETED	5	3	5
Lost to Follow-up	2	2	5
Neutropenia	3	1	0

"Customized" Reason for Non-completion

# Participant Flow

## Participant Flow Template

ClinicalTrials.gov

Recruitment Details	
[*] Pre-assignment Details	

### Period ①

* Period Title	Overall Study ①			
* Arm/Group Title				
*§ Arm/Group Description ②				
	Number of Participants ④	Number of Participants ④	Number of Participants ④	Number of Participants ④
* Started				
[*] Milestone Title ③				
[*] Milestone Title ③				
[*] Milestone Title ③				
* Completed				
Not Completed	<i>(automatically calculated)</i>			
Reason Not Completed Type ③				
[*] Adverse Event				
[*] Death				
[*] Lack of Efficacy				
[*] Lost to Follow-up				
[*] Physician Decision				
[*] Pregnancy				
[*] Protocol Violation				
[*] Withdrawal by Subject				
[*] Other Reason				
[*] Other Reason				
[*] Other Reason				

\* Required

\*§ Required if Primary Completion Date is on or after January 18, 2017

[\*] Conditionally required

## Tip

- Use templates to help prepare for the data entry

# Baseline Characteristics

- **4 categories of characteristics are required**
  - Age (continuous, categorical, or customized)
  - Sex/gender
  - Race and ethnicity
  - Study specific measures\*

## **Tip:**

- **\*Most outcomes will have a baseline study specific measure entered**  
**Note: PRS will flag an outcome that is “change from baseline” and no baseline value is entered here**

# Baseline Characteristics

## Key data elements

* Study-Specific Baseline Measure Title:	<input type="text" value="Title of measure"/>
[*] Measure Analysis Population Description:	<input type="button" value="Edit"/> Additional information about the analysis population (e.g., why a Row population differs from the Overall) <input type="text" value="Enter why the 'n' is different than overall 'n'"/>
* Measure Type:	<input type="text" value="Mean"/>
* Measure of Dispersion:	<input type="text" value="Standard Deviation"/>
* Unit of Measure:	<input type="text" value="Unit (can use suggestion or other)"/> Commonly reported units: <input type="text" value="years"/> <input type="text" value="units on a scale"/> <input type="text" value="participants"/>

## Tips:

- If the 'n' for a measure differs from the overall 'n', this must be explained.
- All entries require a measure type and dispersion (statistician input is essential)
- Acronyms must be defined
- Entries should be consistent with the statistical analysis plan

# Outcomes & Statistical Analysis

* Outcome Measure Type:	Secondary
* Outcome Measure Title:	Title of measure
* Outcome Measure Time Frame:	12 weeks after start of treatment
* Measure Type:	Mean
* Measure of Dispersion:	Standard Deviation
* Unit of Measure:	Units here Commonly reported units: years units on a scale participants

## Tips:

- Data should use same terms, measure type and dispersion as baseline characteristics
- Keep titles simple (can be changed from outcomes entered when registering if too detailed)
- Primary and secondary outcome results are required; other outcomes are optional

# Outcomes

Outcome Measure Template Example 1		(Units=Participants; Measure Type=Count of Participants; Measure of Dispersion/Precision=Not Applicable)		ClinicalTrials.gov	
* Outcome Measure Type	(Select One) <b>Primary</b> Secondary Other Pre-specified Post-Hoc				
* Outcome Measure Title	Number of Participants With Myocardial Infarction, Stroke or Death From Cardiovascular Causes				
[*] Outcome Measure Description	Participants were monitored for up to 2 years. This is the number of participants who have had at least one myocardial infarction or stroke, or if they died from cardiovascular causes during the time of observation.				
* Outcome Measure Time Frame	Up to 2 years				
* Arm/Group Title		Low-dose Aspirin Therapy	Beta Blocker Therapy		
*§ Arm/Group Description ①		Participants with familial history of cardiovascular disease received 81 mg Aspirin once daily	Participants with familial history of cardiovascular disease received 100 mg Beta Blocker once daily		
* Overall Number of Participants Analyzed		1,545	1,524		
[*] Analysis Population Description		All participants who received at least one dose of treatment.			
* Measure Type	* Measure of Dispersion/Precision				
(Select One) <b>Count of Participants ②</b> Mean Median Least Squares Mean (LSM) Geometric Mean Geometric LSM Number Count of Units	(Select One) <b>Not Applicable ③</b> Standard Deviation Standard Error Inter-Quartile Range Full Range % Confidence Interval Geometric Coefficient of Variation				
		277	② ③	246	② ③
* Unit of Measure	Participants				

## Tip

- Use templates to help prepare for the data entry

\* Required

\*§ Required if Primary Completion Date is on or after January 18, 2017

[\*] Conditionally required

# Outcomes & Statistical Analysis

<i>Statistical Analysis Template</i>		<i>ClinicalTrials.gov</i>			
<b>Statistical Analysis Overview</b>	* Comparison Group Selection ①	<input type="checkbox"/> Arm/Group 1	<input type="checkbox"/> Arm/Group 2	<input type="checkbox"/> Arm/Group 3	
	Comments ②				
	* Type of Statistical Test	(Select One) Superiority Non-inferiority		Equivalence Other (for example, single group or other descriptive analysis)	
	[*] Comments ③				
<b>Statistical Test of Hypothesis</b>	[*] P-Value (if applicable)	_____ (calculated value, not the a priori threshold for statistical significance)			
	Comments ②				
	[*] Method (required if p-value entered)	(Select One) ANCOVA ANOVA Chi-Squared Chi-Squared, Corrected Cochran-Mantel-Haenszel	Fisher Exact Kruskal-Wallis Log Rank Mantel Haenszel McNemar	Mixed Models Analysis Regression, Cox Regression, Linear Regression, Logistic Sign Test	t-Test, 1-Sided t-Test, 2-Sided Wilcoxon (Mann-Whitney) Other (_____)
	Comments ②				
<b>Method of Estimation</b>	[*] Estimation Parameter (if applicable)	(Select One) Cox Proportional Hazard Hazard Ratio (HR) Hazard Ratio, Log Mean Difference (Final Values)	Mean Difference (Net) Median Difference (Final Values) Median Difference (Net) Odds Ratio (OR)	Odds Ratio, Log Risk Difference (RD) Risk Ratio (RR) Risk Ratio, Log	Slope Other (_____)
	Estimated Value	_____ (calculated value)			
	Confidence Interval (if applicable)	Level: _____ % Confidence Interval Number of Sides: (Select One) 2-sided 1-sided Lower Limit: _____ Upper Limit: _____			
	Parameter Dispersion	Type: (Select One) Standard Deviation Standard Error of the Mean Value: _____			
	Estimation Comments ②				
<b>Other Statistical Analysis ④</b>					

## Tips

- Statistical analysis should match statistical analysis plan
- Critical for statistician or knowledgeable investigator to be involved
- Every outcome requires an analysis entry

# Adverse events

All-Cause Mortality ⓘ

▼ Serious Adverse Events ⓘ

▼ Other (Not Including Serious) Adverse Events ⓘ

Frequency Threshold for Reporting Other Adverse  
Events

- Need number affected, overall number at risk, AE term, Organ System, how AEs were collected.
- Can define a frequency threshold (e.g., 5%) for AEs to limit data entry to the most relevant events

# Summary

- Frequently refer to data element definitions guide for data entry
- Collaborate with study team to complete registration and submit results
  - Study team = investigators, coordinator AND statistician
- Give yourself ample time for entry
- Don't be hesitant to contact PRS with questions
- Review examples of various study types:  
<https://clinicaltrials.gov/ct2/manage-recs/present>
